

CCSAPAJ1

Maintain compliance with archaeological requirements

Overview

This standard is for archaeologists who have responsibility to ensure that works affecting archaeological sites are undertaken in compliance with relevant legislation and regulations. They are likely to be employed by national government heritage agencies or local government bodies. This unit covers assessing proposals and, where necessary, works already carried out; deciding whether or not formal consent is required and taking appropriate action. It also deals with the negotiation of amendments to agreements and recommendations for enforcement action in cases of non-compliance

CCSAPAJ1

Maintain compliance with archaeological requirements

Performance criteria

You must be able to:

Identify situations requiring formal action

- P1 identify and apply relevant technical and ethical standards
- P2 monitor sources of information for indications of potentially relevant situations
- P3 make arrangements to investigate potentially relevant situations to identify whether they are within scope of legislative and national Government policy requirements
- P4 identify and notify those responsible for relevant situations of legislative or policy requirements
- P5 advise on or instigate any follow up action to ensure compliance where legislative or policy requirements are not met
- P6 record information on relevant situations

Process proposals for development or other land-use change for compliance with statutory and national policy requirements

You must be able to:

- P7 promptly acknowledge proposals received and categorise against statutory and policy requirements
- P8 appraise the impact of proposals on the archaeological resource with reference to relevant sources of information
- P8 advise relevant decision-making body and applicants of the requirements for any additional information needed where information is insufficient to make an appropriately informed decision, designation or land allocation
- P9 advise the relevant decision-making body on the suitability of any archaeological information provided in support of a proposal.
- P10 advise the relevant decision-making body and applicant of the suitability of the proposal and of any conditions or agreements, should it be approved
- P11 ensure advice is compliant with relevant national legislation and policy and can be justified and defended if challenged

Control project against agreed quality standards

You must be able to:

- P12 Specify or approve project specification to appropriate quality standards accurately, from available information in an appropriate style and format and communicate to interested parties
- P13 identify and verify individual responsibilities for maintaining quality standards
- P14 identify specifications which conflict with statutory and legal requirements and refer these to interested parties for modification
- P15 check materials to ensure they conform with specified requirements

CCSAPAJ1

Maintain compliance with archaeological requirements

- P16 check working methods to ensure they conform with specifications and quality standards
- P17 identify and record work which fails to meet required standards and advise on appropriate action
- P18 agree relevant amendments to specification including project quality requirements with interested parties and record accurately
- P19 record failures to respond appropriately and in a given time to written requests to remedy unacceptable standards and notify interested parties

Enforce compliance with archaeological requirements

- P20 Notify relevant enforcement authority of potential breaches in compliance in accordance with statutory and policy requirements
- P21 Advise (including on behalf of relevant enforcement authority) of changes necessary to restore compliance, agree with persons responsible and record as accurately as appropriate
- P22 Advise on the implementation of appropriate legal or professional conduct proceedings in serious cases of breach of compliance
- P23 submit clear and accurate evidence of breaches to appropriate authorities
- P24 check compliance with legal requirements and implement further legal proceedings for situations which remain in default
- P25 accurately record and communicate satisfactory compliance to all interested parties

You must be able to:

CCSAPAJ1

Maintain compliance with archaeological requirements

Knowledge and understanding

You need to know and understand:

- K1 how to investigate situations required to conform with legislative and policy requirements
- K2 the legislative and policy requirements for potentially relevant situations
- K3 types of action to ensure compliance
- K4 types of records
- K5 how to record information
- K6 how to monitor information resources
- K7 variety and contexts of applications and proposals
- K8 the information required
- K9 types of legally binding documentation
- K10 types of decision criteria
- K11 types of conditions
- K12 relevant technical and ethical standards
- K13 types of exceptional circumstance warranting consultation and investigation
- K14 the contingent strategies and recognised options modifications
- K15 statutory and legal requirements
- K16 national/local/organisational requirements
- K17 archaeological/externally contractual requirements
- K18 the archaeologist's relationship to the quality standards in terms of
 - authority
 - supervision
 - responsibility
 - accountability
- K19 systems for verifying quality
- K20 how to monitor and evaluate data
- K21 how to carry out inspection
- K22 feedback loops and reporting mechanisms
